

NKOT180 Nick Baler Scrap Tyre Baling Machine

The long stroke baler machine is also popular as perfect OTR Tire baler (such as TBR vertical baler) and aluminum can baler. This vertical hydraulic press is designed for long stroke pressing, also with deep size chamber and known as Tire baling machine or can press.

Features:

Tire Balers mainly used for scrap tires, small car tire, rubber compression packaging. This baling machine is specialized in tires compress and baling. Hydraulic baling press machine pressure open the door, two cylinders, manual valve operate, make the hydraulic balers more durable and reliable, Mobile and Stationary type double Anti-kickback devices. Front & Back opening doors for convenient strapping and bale ejecting, the baling press machine is perfect.

Model	NKOT180
Hydraulic power	180Ton
Packaging size (L*W*H)	1800*1200*700-1250 mm
Feed opening size (L*H)	1800*750mm
Chamber Size (L*W*H)	1800*1200*2100 mm
Capability	4-5 bale/hour
Bale weight	1300-2000Kg
Voltage	380V/50HZ
Power	30KW/40HP
Weight	9000Kg

Scrap tyre baler or Scrap Tire Rubber Press Baler Machine mainly designed for tires compression and package. NKOT150 Tyre baler machine is special design for the tires. OTR Tyre , truck tyres , car tyres and all kind of wheels , this machine is Hydraulic door opening type, double cylinder, has manual valve and electric valve operation function . meanwhile , NKOT180 Tire compactor is Suitable for compressing automobile tires, waste rubber, etc, rubber raw material products. also the big tyre , rubber and plastic baling purpose . it use original England brand sealing parts, the function of this baler is improve the life time of oil cylinder. Specially , the Oil pipe joint adopts conical without gasket form, no oil leakage phenomenon. to ensure 100% concentricity, and extend use life of pump.
